

Assignment 1: Information resources

Locate a resource relating to the highly topical sustainability issue of climate action. This source can be in any format (e.g. a local newspaper article, a blog, a website, a YouTube video, a TV news report, a magazine column, a peer-reviewed journal article, etc.). Please make sure that your source is in English.

Write a brief summary of the source (around 100 words) outlining its main points/purpose.

Critically evaluate that source using the criteria of the CRAAP framework (Currency, Relevance, Authority, Accuracy, and Purpose) covered in week 2 (no more than 100 words for each criterion). Make sure that your evaluation is supported with evidence.

Make a concluding statement about your overall assessment of the credibility of the source.

Provide a reference for your chosen source in APA 7 format.

Self-assess your work to ensure you have passed each of the four achievement criteria for this assignment.

Assignment 1 Components

When you submit Assignment 1, the following must be included (use the template in the Assignment 1 resources folder):

- A copy of the source or a link to it
- A summary of the source
- Your evaluation of the source using the CRAAP criteria
- A conclusion about the credibility of the source
- Reference for the source in APA format
- Completed self-assessment rubric

Please remember to save your work as a pdf before submission
